PRAJWAL GUJAR

DevOps Engineer | Azure DevOps | Terraform | Kubernetes (AKS) | Docker | Helm | CI/CD

Pune, Maharashtra, India | +91 7040452312 | prajwal.s.gujar@gmail.com

SUMMARY

DevOps Engineer in Pune with hands-on experience in Microsoft Azure, Azure DevOps and CI/CD pipeline automation using Azure Pipelines and Jenkins. Provision Azure infrastructure with Terraform (Infrastructure as Code), which cut deployment time by 45%. Deploy and manage containerized applications with Docker, Kubernetes, AKS and Helm, monitored using Prometheus and Grafana. Use SonarQube for code quality checks and Python and Bash for deployment automation.

TECHNICAL SKILLS

Cloud: Microsoft Azure (Virtual Machines, Storage Accounts, Azure SQL, Resource Groups), AWS (EC2, S3, IAM)

CI/CD & DevOps: Azure DevOps, Azure Pipelines, Jenkins, YAML, CI/CD, Build & Release Automation, Deployment Automation, SonarQube

Infrastructure as Code: Terraform, Terraform Modules, Infrastructure as Code (IaC), Ansible

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Azure Kubernetes Service (AKS), Helm, Helm Charts

Monitoring & Observability: Prometheus, Grafana, Metrics, Dashboards, Alerting

Version Control: Git, GitHub, Azure Repos, Git Branching, Pull Requests

Networking: Azure VNet, NSG, IP, DNS, HTTP/HTTPS, Ports, Load Balancing, Application Gateway

Operating Systems & Scripting: Linux, Windows, Bash, Python

PROFESSIONAL EXPERIENCE

Freelance DevOps Engineer — Independent / Contract Work **Jan 2025 – Jul 2026**

- Delivered DevOps and cloud infrastructure support on short-term freelance projects with a small team, including CI/CD setup and containerized application deployment.
- Provisioned and managed cloud infrastructure using Terraform for client projects, applying Infrastructure as Code practices for repeatable deployments.
- Set up CI/CD pipelines and containerized applications using Docker for small-scale client and personal projects.

DevOps Engineer — Barquecon Technology Pvt Ltd **2022 – 2024**

- Designed and implemented CI/CD pipelines to automate software delivery, improving deployment efficiency by 35%.
- Provisioned Azure infrastructure using Terraform and Infrastructure as Code, reducing deployment time by 45%.
- Implemented automated testing and code quality checks using SonarQube, contributing to a 15% reduction in production bugs.
- Managed containerized applications using Docker and Kubernetes to support deployment, resource utilization and scaling.
- Enforced branch policies and pull request workflows in Azure Repos, requiring code review and build validation before merge.

Jr. DevOps Engineer — Barquecon Technology Pvt Ltd **2021 – 2022**

- Assisted in provisioning and managing Azure Virtual Machines, Storage Accounts and Azure SQL Databases.
- Automated deployment tasks using Python and Bash scripts, reducing manual steps in provisioning and release workflows.
- Monitored infrastructure health and investigated bottlenecks to identify and troubleshoot infrastructure issues.
- Designed and implemented CI/CD pipelines using Jenkins and Azure DevOps to automate software delivery, improving deployment efficiency by 35%.

PROJECTS

Azure Infrastructure & CI/CD Automation

- Provisioned Azure infrastructure using Terraform and managed resources through Infrastructure as Code.
- Assisted in setting up variable groups in Azure DevOps for managing environment-specific configuration values.

AKS Application Deployment & Monitoring

- Deployed containerized applications to Azure Kubernetes Service (AKS) using Kubernetes Deployments, Services, ConfigMaps, Secrets, health probes, and resource limits.
- Used Helm to package and standardize Kubernetes application deployments and configurations.
- Implemented Prometheus and Grafana for Kubernetes monitoring, dashboards, and alerts covering CPU, memory, pod availability, and container performance.

EDUCATION

Bachelor of Engineering (B.E) in Computer Engineering — Amrutvahini College of Engineering, Sangamner 2015 – 2019
